

DENON AVC-A10H

13.4-Ch 150W 8K AV Amplifier with HEOS® Built-in

The Denon A-Series line stands for the very best that Denon has to offer. Built on more than 110 years of industry-leading innovation, products with the A-Series designation represent the pinnacle of quality.

HIGHLIGHTS	YOUR BENEFITS
Robust 13.4 channel amplifier	The AVC-A10H's 13-channel monolithic power amp delivers 150 watts per channel. As is typical in high-end amplifier designs, each channel is built on its own PCB to minimize crosstalk and distortion.
State-of-the-art home theatre	All seven HDMI inputs support the highest resolution and fastest frame rates available. The AVC-A10H can pass-through signals up to 8K/60Hz or 4K/120Hz frame rates in gaming scenarios.
Immersive 3D sound	13.4-channel processing powers systems up to 7.4.6 or 9.4.4 speaker configurations with support for Dolby Atmos, DTS:X Pro, IMAX Enhanced, MPEG-H, and AURO-3D.
Next-generation gaming compatibility	With the latest HDMI specification, each HDMI port supports 4K/120Hz which means your video frame rate increases so you can always see who is coming around the corner.
Hi-fi quality, inside and out	Nine audiophile-grade 2-channel DACs maximize resolution for all 17 channels. Premium gold-plated speaker terminals and a rigid, three-layer chassis protect against vibration and interference, significantly reducing noise.
HEOS Built-in	Stream music wirelessly from a variety of free and premium streaming services. Share content to HEOS-enabled devices, like Denon Home speakers, in other rooms.
Audyssey room correction	Audyssey room correction optimizes your system's sound for any space. Upgrade to the Audyssey MultEQ editor app or MultEQ-X PC software (fee required) for advanced control.
Dirac Live upgradability for acoustic optimization	Dirac Live® Room Correction applies state-of-the-art, patented algorithms to digitally analyze and minimize room impact and optimize speaker performance.
Engineered and built in Japan	Designed and manufactured in Denon's Shirakawa factory in Japan, the AVC-A10H was tuned by the Denon Sound Master to provide the truest sonic reproduction.

SINCE 1910 | DEFINING AUDIO EXCELLENCE

Dolby Atmos®

Unleash a fully immersive 3D audio experience from Dolby Atmos content starting from a 5.1.2 and up to a 9.4.4 or 7.4.6 setup. Dolby Surround upmixer engages all speakers to create 3D audio sensation from legacy content. Dolby Atmos Height Virtualization Technology creates the sensation of overhead sound even without a 5.1.2 system.

You can also enjoy Dolby Atmos music tracks available from Apple Music, Amazon HD, and TIDAL through a compatible streaming device.

DTS:X

DTS:X immersive audio content places sound where it would naturally occur in space, creating life-like, multi-dimensional audio. DTS Neural:X upmixer offers improved immersion and heightened realism for legacy content. The built-in DTS:X Pro decoder supports all 13.4 channels of the AVC-A10H. DTS Virtual:X provides immersive audio without height channels.

IMAX Enhanced

IMAX Enhanced is the latest technology from DTS that sets a new standard. See clearer and brighter picture, feel immersive lifelike audio, and experience premium content digitally remastered by IMAX.

Auro 3D

Auro 3D elevates the home theatre experience to amazing new levels by delivering the excitement of 3D sound for music, games, broadcast, and films, thanks to the Auro-Matic upmixing engine.

360 Reality Audio

360 Reality Audio is a new immersive music experience that uses Sony's 360 Spatial Sound technology to place individual sounds such as voices and instruments in a 360 degree spherical sound field.

AirPlay 2 and Apple Siri Voice Control

Stream audio from your favourite music services like Apple Music and Spotify or watch videos from services like YouTube and Netflix from any iPhone, iPad, Mac or Apple TV. Hear audio perfectly synced to your speakers from AirPlay 2 sources. AirPlay 2 also supports multiroom audio—wirelessly stream content to multiple AirPlay 2 compatible devices simultaneously with improved audio buffering to ensure smooth audio playback. AirPlay 2 provides control and grouping of compatible audio devices within the Apple Music or Home app. Use AirPlay 2 in-app or with your voice via Siri.

High-resolution audio

Discover the incredible fidelity of high-resolution audio tracks and enjoy music as the artist intended. A front USB port supports up to 24bit/192kHz hi-res audio playback from a USB drive. Supported audio formats are MP3, WMA, WAV, MPEG- 4/AAC, FLAC, and ALAC.

HDMI Connectivity with ARC/eARC

Supports the latest technology on all HDMI inputs and output. ARC (Audio Return Channel) or eARC (Enhanced Audio Return Channel) makes playing TV audio through your AV Amplifier simple, with a single HDMI connection.

eARC provides HD and 3D audio transmissions such as Dolby TrueHD, DTS HD Master Audio, and Dolby Atmos while ARC is limited to conventional 5.1ch audio formats or PCM.

8K/HDCP 2.3

Enjoy pristine 8K picture quality on your 8K TV or projector. Supports both 8K pass-through and 8K upscaling of 4K content. Supports HDCP 2.3, the latest copy protection standard, for peace of mind when streaming copy-protected content.

Brilliant colour from HDR 10+

Supports HDR (High Dynamic Range), HLG (Hybrid Log Gamma), as well as Dynamic HDR and HDR10+ pass-through. HLG offers HDR technology over broadcast content. Both Dynamic HDR and HDR10+ use dynamic metadata to optimize shadows and highlights as screens change.

Dolby Vision

Dolby Vision is a stunning HDR imaging technology that brings extraordinary colour, contrast, and brightness to the screen. Compatible with Dolby Vision so you can enjoy Dolby Vision content from a compatible source device and TV.

Next-generation gaming

Supports Variable Refresh Rate (VRR), Quick Frame Transport (QFT), and Auto Low Latency Mode (ALLM) for smooth, lag-free gaming experience when connected with compatible gaming devices.

HEOS® Built-in

With HEOS Built-in, your AV Amplifier can stream music wirelessly across compatible HEOS components from a variety of free and premium streaming services. Consumers can also enjoy their favourite music in any room of the home wirelessly. Play the same song in every room or select a different song for each connected room via a variety of streaming sources. Add Denon Home speakers to more rooms and control it all with the HEOS app.

Denon Setup Assistant

Award-winning guided Denon Setup Assistant provides simple, clear instructions to get started. Just connect your AV receiver to your TV and follow the instructions on the TV screen to connect your speakers, perform speaker measurements, and connect source devices. For additional convenience, the AV receiver renames HDMI inputs automatically when connected, or you can rename manually at your convenience.

Audyssey MultEQ XT32

Advanced frequency response correction and filtering provide a more balanced soundstage. Improved microphone technology offers a more accurate experience tailored to your unique acoustic environment.

Dirac Live Upgradability

The interaction between your sound system and the physical layout of your room has a huge impact on sound quality. Dirac Live® Room Correction applies state-of-the-art, patented algorithms to analyze and digitally reduce room impact and enhance speaker performance.

Pre-Amplifier Mode

Pre-Amplifier Mode lets your Denon act as an AV preamp with the latest HDMI connectivity, providing a cleaner signal path and more tolerance in clipping level by disconnecting internal amplifiers.
