

HT/1205 MKII

a.k.a. The Cannon

The HT/1205 MKII establishes a new performance standard for affordable home theatre subwoofers. It avoids electronic gimmickry in favor of properly balanced priorities. It has correctly sized cabinets that are solidly braced and beautifully finished. It also features a sparkling new amp design that effortlessly delivers 500W into an all-new CarbonGlas™ 12" (300mm) driver. The lacquer top plate has a subtle REL logo floating on top while the expensively wrought line-grained composite for the cabinet looks stunning.

The HT/1205 MKII plays 50% louder than its predecessor while also delivering more precision and subtlety. It is capable of output levels more commonly found in models well over \$1,000/£1,000. The new filter design ensures it is fantastic for both theatre and music.

Specifications

Type

Closed box, front-firing driver

Active Driver Size & Material
